Atomic and Molecular Beams
Interaction potentials from velocity dependence of total atom-atom scattering cross sections, Erhard W. Rothe, P. K. Rol, and Richard B. Bernstein—2333
Atomic Mass and Abundance
Atomic Structure and Spectra
Balmer emissions induced by proton impact on molecular H_2, R. H. Hughes, Sabrina Lin, and L. L. Hatfield—2318
Calculation of atomic hfs constants from projected unrestricted Hartree-Fock functions. Constants of F^{19}, N. Bessis, H. Lefebvre-Brion, and C. M. Moser—1441
Effect of correlation on hyperfine interaction in Li, K. F. Berggren and R. F. Wood—198
Excitation of Ne, Ar, and Kr induced by H^+ and He^+ impact (5–35 keV), J. van Eck, F. J. de Heer, and J. Kistemaker—656
Further results concerning half-integral Hylleraas expansions, H. M. Schwartz—1029
K^--mesonic atoms, Y. Eisenberg and D. Kessler—2351
Limits of error for electron density, spin density, and atomic form factor in quantum mechanical calculations, L. B. Redei—420
Low-lying energy levels of lanthanide atoms and intermediate coupling, J. G. Conway and B. G. Wybourne—2325
μ-mesonic x-ray energies and nuclear radii for fourteen elements from $Z = 12$ to 50, H. L. Anderson, C. S. Johnson, and E. P. Hincks—2468
Parametrized Slater modified Hartree-Fock method applied to actinide ions, Carl J. Lenander—1033
Remarks on present status of problem of x-ray deficiency in μ-mesonic atoms, Y. Eisenberg and D. Kessler—2349
Repulsive interaction potentials between rare-gas atoms. Homonuclear two-center systems, Adolf A. Abrahamson—693
State-dependent mass corrections to hfs in hydrogenic atoms, Morton M. Sternheim—211
Variational calculation of ground state of Li atom, E. A. Burke—1871
Auger Effect (see **Atomic Structure and Spectra; Nuclear Spectra; X Rays**)

Chemiluminescence (see **Luminescence**)
Cold Emission (see **Electrical Properties**)
Colloids (see **Chemical Effects and Properties; Molecular Aggregates**)
Compton Effect (see **Radiation**)
Conductivity, Electrical (see **Electrical Conductivity and Resistance**)
Conductivity, Thermal (see **Thermal Properties**)
Constants, Standards, Units
Cosmic Radiation (see also **Mesons and Hyperons**)
Energy spectrum of heavy nuclei of primary cosmic radiation during solar maximum, K. A. Neelakantan and P. G. Shukla—362

Cosmology (see **Astrophysics; Relativity and Gravitation**)
Coulomb Excitation (see **Nuclear Reactions; Nuclear Spectra**)
Critical Potentials (see **Atomic Structure and Spectra; Molecular Structure and Spectra**)
Cross Section (see **Electrons and Positrons; Nuclear Reactions; Radiation; Scattering**)
Crystal Counters (see **Methods and Instruments**)
Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
Acceleration of molecular excitons by electric field, Arthur Bierman—2266
Axially symmetric model for lattice dynamics of metals with application to Cu, Al, and ZrH_2, G. W. Lehman, T. Wolfram, and R. E. DeWames—2599(E)
Band structure of white Sn, Maria Miasek—11
Boltzmann equation for polarons, Leo P. Kadanoff—1364
Calculated vibrational spectra and specific heats of Li and V, John B. Hendricks, Henry N. Riser, and Clifton Bob Clark—1377
Color centers in alkaline earth fluorides, J. R. O'Connor and J. H. Chen—1790
Color centers in mixed crystals of alkali halides, A. Smakula, N. C. Maynard, and A. Repucci—113
Conductivity of polycrystals, Z. Hashin and S. Shtrikman—129
Covalency and paramagnetic resonance of Mn^{++} in CdSe, Reuben S. Title—17
Covalency effects in $KNiF_3$. I. Nuclear magnetic resonance studies, R. G. Shulman and S. Sugano—506; II. Optical studies, K. Knox, R. G. Shulman, and S. Sugano—512; III. Theoretical studies, S. Sugano and R. G. Shulman—517
Cu^{3+} ion in corundum, W. E. Blumberg, J. Eisinger, and S. Geschwind—900
Divalent rare earth spectra selection rules and spectroscopy of $SrCl_2$:Sm^{+2}, J. D. Axe and P. P. Sorokin—945
Effective magnetic field and gradient of electric field acting on nucleus of Eu in Eu Fe garnet, G. Gilat and I. Nowik—1361
Effects of electron correlations on properties of alkali metals, S. D. Silverstein—912
Electron number of N atom in Mn_4N, Masao Kuriyama, Sukeaki Hosoya, and Tadasu Suzuki—898
Electronic band structure of group IV elements and of III-V compounds, F. Bassani and M. Yoshimine—20
Exchange energy of electron gas in periodic potential, Leonard Eyges—2218
Fluorescence of Sm^{3+} in CaF_2, Norman Rabbiner—502
Frequency dependence of high-frequency transport properties of cubic crystals, Keith S. Champlin—1374
General treatment of conduction electron redistribution due to point defect complexes and lattice distortion in noble metals, K. H. Bennemann—1763
Heat capacity of α-CuZn alloys below 4.2°K, B. W. Veal and J. A. Rayne—2156
Higher random phase approximations and theory of electron gas, Giu Do Dang and Abraham Klein—2572
Influence of spin of electron on quantum magnetoacoustic effect in metals, Sergio Rodriguez—929
Isothermal annealing of deuteron-irradiated Al and Au below 60°K, K. Herschbach—554
Lattice vibrations of zincblende structure crystals, Harvey Kaplan and John J. Sullivan—120
Lifetime of excited F center, Robert K. Swank and Frederick C. Brown—34
Low-field galvanomagnetic coefficients of Ga, W. A. Reed and J. A. Marcus—957
Magnetic and crystal structure of Ti_2O_3, S. C. Abrahams—2230

Magnetoconductivity and polar scattering in moderately ionic crystals, F. Garcia-Moliner—2290
Many-body aspects of dipolar interaction in crystal lattices, R. Bersohn and T. P. Das—98
Melting and polymorphic transitions for some group II-VI compounds at high pressures, A. Jayaraman, W. Klement, Jr., and G. C. Kennedy—2277
Melting and polymorphism at high pressures in some group IV elements and III-V compounds with diamond/zinc-blende structure, A. Jayaraman, W. Klement, Jr., and G. C. Kennedy—540
Modification of velocity of sound in metals by applied magnetic field, Sergio Rodriguez—1778
Mössbauer effect in metallic Fe, R. S. Preston, S. S. Hanna, and J. Heberle—2599(E)
Neutron diffraction study of short-range order in β-CuZn, C. B. Walker and D. T. Keating—1726
Optical absorption in ionic crystals involving small polarons, D. M. Eagles—1381
Optical spectrum of divalent V in octahedral coordination, M. D. Sturge—639
Order-disorder events produced by single vacancy migration, J. R. Beeler, Jr., and J. A. Delaney—962
Phonon-magnon interaction in magnetic crystals. II. Antiferromagnetic systems, U. N. Upadhyaya and K. P. Sinha—939
Proton-lattice interactions in H-bonded ferroelectric crystals, R. Blinc and M. Ribarič—1816
Pseudoquadrupole coupling constants and nuclear moments of several Pm isotopes, R. W. Grant and D. A. Shirley—1100
Shubnikov-de Haas effect in Bi. II, Lawrence S. Lerner—605
Spin-orbit coupling in band structure of Mg and other hcp metals, L. M. Falicov and Morrel H. Cohen—92
Static magnetoelastic coupling in cubic crystals, Earl R. Callen and Herbert B. Callen—2600(E)
Temperature dependence of lattice parameters for Gd, Dy, and Ho, F. J. Darnell—1825
Temperature dependence of spin-lattice relaxation in alkali halides, Marvin J. Weber—1
Theory of electronic polarizabilities of ions in crystals; application to alkali halide crystals, A. R. Ruffa—1412
Theory of metallic diamond, W. F. Libby—548
Theory of range of hot electrons in real metals, Stephen L. Adler—1654
Topology of Fermi surface of Zn from galvanomagnetic measurements, W. A. Reed and G. F. Brennert—565
Use of symmetry in determination of magnetic structures, John O. Dimmock—1337
Weak-coupling rate equations and initial conditions, Robert L. Peterson—612
X-ray and magnetization studies of Cr-modified Mn_2Sb, F. J. Darnell, W. H. Cloud, and H. S. Jarrett—647

Diamagnetism (see **Magnetic Properties**)

Dielectrics and Dielectric Properties
Dielectric formulation for many-particle systems with general interactions, Pedro Pascual and L. M. Falicov—1310
Electrical and optical properties of vitreous Se, H. P. D. Lanyon—134
Generalized self-consistent field theory and dielectric formulation of many-body problem, Morrel H. Cohen—1301
Infrared absorption at longitudinal optic frequency in cubic crystal films, D. W. Berreman—2193
Paraelectric response of KD_2PO_4, R. M. Hill and S. K. Ichiki—150
Proton-lattice interactions in H-bonded ferroelectric crystals, R. Blinc and M. Ribarič—1816
Theory of electronic polarizabilities of ions in crystals; application to alkali halide crystals, A. R. Ruffa—1412
Theory of quadratic response functions, P. J. Price—1792

Diffraction (see also **Scattering**)
Magnetic and crystal structure of Ti_2O_3, S. C. Abrahams—2230
Neutron diffraction study of short-range order in β-CuZn, C. B. Walker and D. T. Keating—1726

Diffusion
Diffusion, solubility, and electrical properties of Cu in InSb, Hans Juerg Stocker—2160
Order-disorder events produced by single vacancy migration, J. R. Beeler, Jr., and J. A. Delaney—962
Semiempirical approach to theory of thermal diffusion in crystals, L. A. Girifalco—2599(E)
Statistics of particle diffusion in spherical geometry, B. T. McClure—1295

Discharge of Electricity in Gases (see **Electrical Discharges**)

Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)

Dynamics (see **Mechanics**)

Elasticity and Plasticity
Calculated vibrational spectra and specific heats of Li and V, John B. Hendricks, Henry N. Riser, and Clifton Bob Clark—1377
Deformation potentials in Si. II. Hydrostatic strain and electron-phonon interaction, Leonard Kleinman—2283
Elastic constants of Ta, W, and Mo, F. H. Featherston and J. R. Neighbours—1324
Melting and polymorphic transitions for some group II-VI compounds at high pressures, A. Jayaraman, W. Klement, Jr., and G. C. Kennedy—2277
Static magnetoelastic coupling in cubic crystals, Earl R. Callen and Herbert B. Callen—2600(E)

Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)

Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Conductivity of polycrystals, Z. Hashin and S. Shtrikman—129
Dependence of electrical conductivity and thermoelectric power of pure and Al-doped rutile on equilibrium O_2 pressure and temperature, J. Yahia—1711
Diffusion, solubility, and electrical properties of Cu in InSb, Hans Juerg Stocker—2160
Electrical and optical properties of vitreous Se, H. P. D. Lanyon—134
Hall coefficient of superconducting and normal Nb-25% Zr, A. I. Schindler and D. J. Gillespie—953
Low-field galvanomagnetic coefficients of Ga, W. A. Reed and J. A. Marcus—957
Magnetoconductivity and polar scattering in moderately ionic crystals, F. Garcia-Moliner—2290
Piezoresistance and piezo-Hall effect in n-type Si, J. E. Aubrey, W. Gubler, T. Henningsen, and S. H. Koenig—1667
Recovery study in pure and alloyed Al following electron irradiation, A. Sosin and L. H. Rachal—2238
Shubnikov-de Haas effect in Bi. II, Lawrence S. Lerner—605

Electrical Discharges
Anisotropic electron distribution and dc and microwave avalanche breakdown in H_2, G. A. Baraff and S. J. Buchsbaum—1007
Electron ionization frequency in H_2, William B. Cottingham and S. J. Buchsbaum—1002
Microwave breakdown in air, O_2, and N_2, A. D. MacDonald, D. U. Gaskell, and H. N. Gitterman—1841

Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Dependence of electrical conductivity and thermoelectric power of pure and Al-doped rutile on equilibrium O_2 pressure and temperature, J. Yahia—1711
Observation of magnetoelectric effect in Cr_2O_3 powders, S. Shtrikman and D. Treves—986
Secondary electron emission produced by relativistic primary electrons, Arvid A. Schultz and Martin A. Pomerantz—2135
Two-photon photoelectric effect, Richard L. Smith—2599(E)
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)
Backscatter from inhomogeneous media, P. J. Lynch—1235
Electron velocity distribution in slightly ionized gas with crossed electric and strong magnetic fields, Gary A. Pearson and Wulf B. Kunkel—864
Further discussion of role of electromagnetic potentials in quantum theory, Y. Aharonov and D. Bohm—1625
Harmonics in scattering of light by free electrons, Vachaspati—2599(E)
Inequivalent Hamiltonian formalisms in electrodynamics, Melvin Schwartz—1595
Quantum statistics of masers and attenuators, J. P. Gordon, L. R. Walker, and W. H. Louisell—806
Theory of cavity masers, D. E. McCumber—675
Electron Diffraction (see **Diffraction; Scattering of Electrons and Positrons**)
Electron Optics (see **Electromagnetic Theory and Electrodynamics**)
Electronic Tubes (see **Methods and Instruments**)
Electrons and Positrons (see also **Electromagnetic Theory and Electrodynamics; Elementary Particle Interactions; Scattering of Electrons and Positrons**)
Positron annihilation in condensed gases, D. C. Liu and W. K. Roberts—2322
Positron annihilation in liquid and solid Hg, D. R. Gustafson, A. R. Mackintosh, and D. J. Zaffarano—1455
Positronium decay in Teflon. Influence of lattice transitions, G. Fabri, E. Germagnoli, and G. Randone—204
Precision measurement of g factor of free electron, D. T. Wilkinson and H. R. Crane—852
Electrons, Mobility (see **Ions and Electrons, Mobility**)
Electrons, Scattering of (see **Scattering of Electrons and Positrons**)
Electrons, Secondary (see **Electrical Properties**)
Electrons, Thermionic (see **Electrical Properties**)
Electro-Optical Effects (see **Optical Properties**)
Electrostriction (see **Dielectrics and Dielectric Properties**)
Elementary Particle Interactions, General
Branching ratios of reactions of mesons stopped in H and D, James W. Ryan—1554
Isotopic spin of exchange systems, Leslie L. Foldy and Ronald F. Peierls—1585
Elementary Particle Interactions, Electromagnetic
$e^+ + e^- \rightarrow \pi^+ + \pi^- + \pi^0$ and overlapping resonances, David R. Harrington—2502
Electrodisintegration of H^3 and He^3, Ronald McClure Haybron—2080
Electromagnetic corrections to weak interactions. β decays of muon, neutron, and O^{14}, Loyal Durand, III, Leon F. Landovitz, and Robert B. Marr—1188
Electron-proton scattering at high momentum transfer, K. Berkelman, M. Feldman, R. M. Littauer, G. Rouse, and R. R. Wilson—2061
Energy dependence of proton electromagnetic form factors, S. H. Patil—2448
Final-state interactions in electrodisintegration of D, J. Nuttall and M. L. Whippman—2495
Low-energy process $\gamma + p \rightarrow K^+ + \Sigma^0$, T. K. Kuo—1537
Photoproduction of single neutral pions from H at energies 0.6 to 1.2 BeV, R. Diebold—2089
Positive pion production by polarized x rays between 227 and 373 MeV, R. C. Smith and R. F. Mozley—2429
Radiative corrections to high-energy scattering processes, N. Meister and D. R. Yennie—1210
Radiative ρ-meson decay, Paul Singer—2441
Renormalizable electrodynamics of vector mesons, Abdus Salam—1287
Statistical analysis of electron-proton scattering, M. W. Kirson and J. S. Levinger—1549
Use of radiative π decay to limit neutrino mass, Alfred S. Goldhaber—760
Elementary Particle Interactions, Strong
Coupled channel approach to $J=3^+/2$ resonances in unitary symmetry model, A. W. Martin and K. C. Wali—2455
Effects of ρ meson on nucleon form factors, J. S. Ball and D. Y. Wong—2112
Elastic-differential cross section of $\pi^+ + p$ at 1.5, 2.0, and 2.5 BeV/c, Victor Cook, Bruce Cork, William R. Holley, and Martin L. Perl—762
Elementary particle theory of composite particles, Steven Weinberg—776
Experimental study of double-charged pion production in (π^-, p) collisions at 900 MeV, Derek C. Colley and Joseph T. Ratau—357
Extrapolation methods and nucleon-deuteron breakup reaction, I. J. R. Aitchison—2484
High-energy nucleon-nucleon scattering, Ivan J. Muzinich—1571
Low-energy $\Sigma^- - p$ and $\Sigma^- - d$ interactions and pion-hyperon coupling constants, J. J. de Swart and C. K. Iddings—319
Neutron-proton scattering below 20 MeV, H. Pierre Noyes—2025
New limit for isotopic spin conservation in strong interactions from experimental limit on $\sigma(d+d \rightarrow He^4 + \pi^0)$, John A. Poirier and Morris Pripstein—1171
Nonleptonic hyperon decays in pole approximation and strong-coupling constants, Jogesh Chandra Pati—2097
Nucleon form factors in strong-coupling meson theory, R. Morita—833
p-p higher partial waves and 3-meson model, William Ramsay—1552
Polarization in neutron-proton scattering at 23.1 MeV, R. B. Perkins and J. E. Simmons—272
Reaction $\pi^- + p \rightarrow \pi^- + \pi^+ + n$ from 360 to 800 MeV, Janos Kirz, Joseph Schwartz, and Robert D. Tripp—2481
Scattering of 19.2 GeV/c protons on free protons in nuclear emulsion, V. A. Bull and D. A. Garbutt—1182
Σ^- capture in deuterium, Donald E. Neville—327
Singularities in unphysical sheets and isobar model, Rudolph C. Hwa—2580
Spontaneous breakdown of octet symmetry, S. L. Glashow—2132
Strange-particle production by 4.65-BeV/c π^- mesons, L. Bertanza, B. B. Culwick, K. W. Lai, I. S. Mittra, N. P. Samios, A. M. Thorndike, S. S. Yamamoto, and R. M. Lea—786
Test of charge symmetry of K^+ and K^0 mesons in associated production process, Janice B. Shafer, Frank S. Crawford, Richard Hubbard, M. Lynn Stevenson, Martin Block, Arnold Engler, Rosanna Gessaroli, Arthur Kovacs, Carl Meltzer, Richard Kraemer, Mirko Nussbaum, Aihud Pevsner, Peter Schlein, and David Onley—2077

Theoretical nucleon-nucleon potential, W. M. Cottingham and R. Vinh Mau—735
Theory of $J=3/2$, $I=3/2$ πN resonance, Virendra Singh and Bhalchandra M. Udgaonkar—1177
Theory of low-energy nucleon-nucleon scattering. IV. Numerical results for high partial waves ($l \geq 2$), D. Amati, E. Leader, and B. Vitale—750
Two vacuum poles and pion-nucleon scattering, Keiji Igi—820

Elementary Particle Interactions, Weak
Consequences of weak vector boson for decay $K \to \mu + \nu + \gamma$, Edward S. Ginsberg and R. H. Pratt—2105
Dispersive treatment of weak decays and final state interactions in model theories, Kurt Haller and Leon F. Landovitz—2593
Electromagnetic corrections to weak interactions. β decays of muon, neutron, and O^{14}, Loyal Durand, III, Leon F. Landovitz, and Robert B. Marr—1188
Isotopic spin in $K \to 3\pi$, G. Barton, C. Kacser, and S. P. Rosen—783
K leptonic decay and partially-conserved currents, George Zweig—2449
Lifetime of Λ^0 hyperon, M. M. Block, R. Gessaroli, S. Ratti, L. Grimellini, T. Kikuchi, L. Lendinara, L. Monari, E. Harth, W. Becker, W. M. Bugg, and H. Cohn—766
New determination of K_1^0 branching ratio, John L. Brown, John A. Kadyk, George H. Trilling, Byron P. Roe, Daniel Sinclair, and John C. Vander Velde—769
Nonleptonic decays of hyperons, Suraj N. Gupta—1180
Nonleptonic hyperon decays in pole approximation and strong-coupling constants, Jogesh Chandra Pati—2097
3π decay modes of $K^{\pm}$ and η, Claude Kacser—355
Upper limit for nonleptonic $\Delta S=2$ decay mode of Ξ^-, Massimiliano Ferro-Luzzi, Margaret H. Alston, Arthur H. Rosenfeld, and Stanley G. Wojcicki—1568
Use of radiative π decay to limit neutrino mass, Alfred S. Goldhaber—760

Elements (see **Atomic Mass and Abundance**)

Errata
Axially symmetric model for lattice dynamics of metals with application to Cu, Al, and ZrH_2, G. W. Lehman, T. Wolfram, and R. E. DeWames—2599(E)
Circular-polarization measurements in the β decay of V^{48}, Co^{56}, Fe^{59}, and Cs^{134}, Lloyd G. Mann, Stewart D. Bloom, and R. J. Nagle—2598(E)
Flow instability in liquid He II, R. Meservey—2598(E)
Harmonics in scattering of light by free electrons, Vachaspati—2599(E)
Isospin conservation and β-γ circular-polarization correlation in mixed transition, Stewart D. Bloom, Lloyd G. Mann, and John A. Miskel—2598(E)
Mössbauer effect in metallic Fe, R. S. Preston, S. S. Hanna, and J. Heberle—2599(E)
Neutrons from deuteron breakup on D, T, and He^4, H. W. Lefevre, R. R. Borchers, and C. H. Poppe—2599(E)
Properties of F^{20}, S. S. Glickstein and R. G. Winter—2599(E)
Semiempirical approach to theory of thermal diffusion in crystals, L. A. Girifalco—2599(E)
Static magnetoelastic coupling in cubic crystals, Earl R. Callen and Herbert B. Callen—2600(E)
Two-photon photoelectric effect, Richard L. Smith—2599(E)

Errors of Measurement (see **Methods and Instruments**)
Evaporation (see **Liquids**)
Excitation of Atoms (see **Atomic Structure and Spectra**)
Excitation of Molecules (see **Molecular Structure and Spectra**)
Excitation of Nucleus (see **Nuclear Reactions; Nuclear Spectra; Nuclear Structure Theory**)
Explosion Phenomena (see **Fluid Dynamics**)

Ferroelectric Phenomena (see **Dielectrics and Dielectric Properties**)
Ferromagnetism (see **Magnetic Properties**)
Field Emission (see **Electrical Properties**)

Field Theory (see also **Quantum Electrodynamics**)
Analysis of partial-wave dispersion relations, Graham Frye and Robert Lee Warnock—478
Application of variation method to field quantization, L. I. Schiff—458
Artificial singularity in N/D equations of new strip approximation, Geoffrey F. Chew—1264
Commutation relations and conservation laws, Julian Schwinger—406
Construction of invariant scattering amplitudes for arbitrary spins and analytic continuation in total angular momentum, Asim O. Barut, Ivan Muzinich, and David N. Williams—442
Coupled channel approach to $J=\frac{3}{2}^+$ resonances in unitary symmetry model, A. W. Martin and K. C. Wali—2455
Crossing symmetry in S-matrix theory, A. O. Barut—436
Dispersion relation for Regge parameters, Hung Cheng—1283
Dispersive treatment of weak decays and final-state interactions in model theories, Kurt Haller and Leon F. Landovitz—2593
Energy and momentum density in field theory, Julian Schwinger—800
Extension of the Regge representation, N. N. Khuri—429
Generalized self-consistent field theory and dielectric formulation of many-body problem, Morrel H. Cohen—1301
N/D method for complex partial waves, K. Bardakci—369
Non-Abelian gauge fields. Lorentz gauge formulation, Julian Schwinger—402
Nucleon form factors in strong-coupling meson theory, R. Morita—833
Partial-wave Bethe-Salpeter equation, Noboru Nakanishi—1230
Perturbation theory of scattering amplitudes at high energies, James D. Bjorken and Tai Tsun Wu—2566
Phase representation of analytic functions, Masao Sugawara and Arnold Tubis—2127
Plasmons, gauge invariance, and mass, P. W. Anderson—439
Quantized gravitational field, Julian Schwinger—1253
Quantum electrodynamics without electromagnetic field, I. Bialynicki-Birula—465
Radiation gauge electrodynamics. I. The two-point function, C. R. Hagen—813
Regge poles in relativistic wave equations, G. S. Guralnik and C. R. Hagen—1259
Regge trajectories and elementary poles, Reinhard Oehme—424
Renormalizable electrodynamics of vector mesons, Abdus Salam—1287
Separable potentials in complex l plane, A. N. Mitra and J. D. Anand—2117
Singularities in unphysical sheets and isobar model, Rudolph C. Hwa—2580
Singularity of Regge amplitude, J. N. Islam, P. V. Landshoff, and J. C. Taylor—2560
Threshold motion of Regge poles, Bipin R. Desai and Roger G. Newton—2109

Films, Properties
Comments on existing theories of magnetic effects on superconducting films, B. Y. Tong—1322

Films, Properties (Continued)
Critical fields of thin superconducting films. II. Mean free path effects in InSn alloy films, A. M. Toxen and M. J. Burns—1808
Infrared absorption at longitudinal optic frequency in cubic crystal films, D. W. Berreman—2193
Limiting critical field in thin superconductors, N. Kusnezov —2253
Spin-wave theory of ferromagnetic thin films, A. Corciovei —2223
Fine Structure (see **Atomic Structure and Spectra**)
Fission of Nucleus (see **Nuclear Fission**)
Fluctuation Phenomena (see **Noise**)

Helium, Liquid and Solid
Experiments on Kapitza resistance, R. C. Johnson and W. A. Little—596
Flow instability in liquid He II, R. Meservey—2598(E)
Pressure coefficient and compressibility of liquid He^4 very close to λ curve, O. V. Lounasmaa—847
Properties of He^3 at pressures greater than minimum in melting curve, A. C. Anderson, W. Reese, and J. C. Wheatley—1644
Specific heat, entropy, and expansion coefficient of liquid He^3, A. C. Anderson, W. Reese, and J. C. Wheatley—495
Hydrodynamics (see **Fluid Dynamics**)
Hyperfine Structure (see **Atomic Structure and Spectra; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Hyperons (see **Mesons and Hyperons**)

Imperfections in Solids (see also **Crystalline State; Electrical Conductivity and Resistance; Luminescence; Semiconductors**)
Color centers in alkaline earth fluorides, J. R. O'Connor and J. H. Chen—1790
Color centers in mixed crystals of alkali halides, A. Smakula, N. C. Maynard, and A. Repucci—113
Dependence of electrical conductivity and thermoelectric power of pure and Al-doped rutile on equilibrium O_2 pressure and temperature, J. Yahia—1711
Displacement cross sections for fast electrons incident on Au, G. S. Khandelwal and E. Merzbacher—1822
Effect of defect fields on optical absorption edge, David Redfield—916
Electric fields of defects in solids, David Redfield—914
Electron spin-lattice relaxation at defect sites; E' centers in synthetic quartz at 3 kilo-oersteds, J. G. Castle, Jr., D. W. Feldman, P. G. Klemens, and R. A. Weeks—577
General method for determining lattice point defect configurations including their dependence on electron redistribution, K. H. Bennemann—1757
General treatment of conduction electron redistribution due to point defect complexes and lattice distortion in noble metals, K. H. Bennemann—1763
Isothermal annealing of deuteron-irradiated Al and Au below 60°K, K. Herschbach—554
Lifetime of excited F center, Robert K. Swank and Frederick C. Brown—34
Low-temperature coloration in KCl and KBr near fundamental edge, Clifford C. Klick and David A. Patterson—2169
Luminescent decay of localized optical excitations in KCl, Herbert Mahr—2257
Order-disorder events produced by single vacancy migration, J. R. Beeler, Jr., and J. A. Delaney—962
Paramagnetic spectra of E_2' centers in crystalline quartz, R. A. Weeks—570
Proton-lattice interactions in H-bonded ferroelectric crystals, R. Blinc and M. Ribarič—1816
Recovery study in pure and alloyed Al following electron irradiation, A. Sosin and L. H. Rachal—2238
Specific heat of various graphites between 0.4 and 2.0°K, B. J. C. van der Hoeven, Jr., and P. H. Keesom—1318
Inelastic Scattering (see **Nuclear Reactions; Scattering**)
Instruments (see **Methods and Instruments**)
Internal Conversion (see **Nuclear Spectra**)
Ionization (see also **Electrical Discharges; Range and Energy Loss**)
Electron shake-off following β decay of Ne^{22}, Thomas A. Carlson—2361
Energy and angular dependence of differential cross section for production of electrons by 50–100 keV protons in H_2 gas, C. E. Kuyatt and T. Jorgensen, Jr.—1444
Ionization processes in decaying plasmas. I. He, Howard Myers—1639
Search for slow component in α ionization, Z. Bay and R. M. Pearlstein—223
Ionization Potentials of Atoms (see **Atomic Structure and Spectra**)
Ionization Potentials of Molecules (see **Molecular Structure and Spectra**)
Ionosphere (see **Geophysics**)
Ions (see also **Electrical Discharges**)
Charge exchange and dissociation of H^+, H_2^+, and H_3^+ ions incident on H_2 gas, G. W. McClure—1852
Excitation of Ne, Ar, and Kr induced by H^+ and He^+ impact (5–35 keV), J. van Eck, F. J. de Heer, and J. Kistemaker—656
Parametrized Slater modified Hartree-Fock method applied to actinide ions, Carl J. Lenander—1033
Quadrupole antishielding factors of ions, R. M. Sternheimer —1423
Theory of electronic polarizabilities of ions in crystals; application to alkali halide crystals, A. R. Ruffa—1412
Ions and Electrons, Mobility (see also **Semiconductors**)
Boltzmann equation for polarons, Leo P. Kadanoff—1364
Isobars (see **Atomic Mass and Abundance**)
Isomers, Molecular (see **Molecular Structure and Spectra**)
Isomers, Nuclear (see **Nuclear Spectra**)
Isotopes (see **Atomic Mass and Abundance; Radioactivity**)

Kerr Effect (see **Optical Properties**)
Kinetic Theory of Gases (see **Gases**)

Liquid Helium (see **Helium, Liquid and Solid**)
Liquids
Positron annihilation in liquid and solid Hg, D. R. Gustafson, A. R. Mackintosh, and D. J. Zaffarano—1455
Luminescence
Divalent rare earth spectra selection rules and spectroscopy of $SrCl_2$:Sm^{++}, J. D. Axe and P. P. Sorokin—945
Fluorescence of Sm^{3+} in CaF_2, Norman Rabbiner—502
Luminescent decay of localized optical excitations in KCl, Herbert Mahr—2257
Optical spectrum of divalent V in octahedral coordination, M. D. Sturge—639

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Cluster expansion for Heisenberg ferromagnet, Bertram Strieb, Herbert B. Callen, and Gerald Horwitz—1798
Comments on spin-lattice relaxation, D. E. McCumber—2271
Covalency effects in $KNiF_3$. II. Optical studies, K. Knox, R. G. Shulman, and S. Sugano—512
Effective magnetic field and gradient of electric field acting on nucleus of Eu in Eu Fe garnet, G. Gilat and I. Nowik—1361
Exchange narrowing of *d* bands in antiferromagnets, Thomas Wolfram and Joseph Callaway—45
Ferromagnetic relaxation. III. Theory of instabilities, R. M. White and M. Sparks—632
Ferromagnetic resonance of holmium nitride, Noboru Tsuya and Yoshio Ebina—960
Green function theory of ferromagnetism, Herbert B. Callen—890
Ground state of interacting spins, Daniel Mattis—76
High-field antiferromagnetic resonance in Cr_2O_3, Simon Foner—183
High-frequency resonance of weak ferromagnet: $MnCo_3$, H. J. Fink and D. Shaltiel—627
Influence of electron interactions on metallic properties. II. Electron spin paramagnetism, S. D. Silverstein—1703
Ising model with long-range interaction in presence of residual short-range interactions, George A. Baker, Jr.—1406
Localized magnetic moments in metals, A. J. Freeman—888
Long-wavelength collective excitations in ferromagnetic insulators. I. Strong coupling of acoustic modes to spin wave modes, R. C. LeCraw and T. Kasuya—50
Low-field galvanomagnetic coefficients of Ga, W. A. Reed and J. A. Marcus—957
Magnetic and crystal structure of Ti_2O_3, S. C. Abrahams—2230
Magnetic first-order phase transition in single-crystal MnAs, R. W. De Blois and D. S. Rodbell—1347
Magnetostriction in cubic Néel ferrimagnets, with application to YIG, E. R. Callen, A. E. Clark, B. DeSavage, W. Coleman, and H. B. Callen—1735
Mössbauer effect in metallic Fe, R. S. Preston, S. S. Hanna, and J. Heberle—2599(E)
Observation of magnetoelectric effect in Cr_2O_3 powders, S. Shtrikman and D. Treves—986
Optical spectrum of divalent V in octahedral coordination, M. D. Sturge—639
Paramagnetic resonance of Cr in $MgTiO_3$, Erhard J. Schimitschek—2199
Phonon-magnon interaction in magnetic crystals. II. Antiferromagnetic systems, U. N. Upadhyaya and K. P. Sinha—939
Polarization effects in magnetic elastic scattering of slow neutrons, M. Blume—1670
Radio-frequency susceptibilities of weak ferromagnets: $MnCo_3$ and NiF_2, H. J. Fink—177
Second anisotropy constant in cubic ferromagnetic crystals, R. J. Joenk—932
Second neighbor exchange integral in EuS, Joseph Callaway and D. C. McCollum—1741
Shubnikov-de Haas effect in Bi. II, Lawrence S. Lerner—605
Spin-wave impurity states in ferromagnets, Thomas Wolfram and Joseph Callaway—2207
Spin-wave spectra of magnetite, M. Lawrence Glasser and Frederick J. Milford—1783
Spin-wave theory of ferromagnetic thin films, A. Corciovei—2223
Static magnetoelastic coupling in cubic crystals, Earl R. Callen and Herbert B. Callen—2600(E)
Temperature dependence of lattice parameters for Gd, Dy, and Ho, F. J. Darnell—1825
Theory of antiferromagnetic spin waves in some metamagnetic crystals, Akio Yoshimori—1312
Thermal fluctuations of single-domain particle, William Fuller Brown, Jr.—1617
Thermodynamic behavior of Heisenberg ferromagnet, R. B. Stinchcombe, G. Horwitz, F. Englert, and R. Brout—155
Topology of Fermi surface of Zn from galvanomagnetic measurements, W. A. Reed and G. F. Brennert—565
Use of Green functions in theory of ferromagnetism. III. *s-d* interactions, R. A. Tahir-Kheli and D. ter Haar—108
Use of symmetry in determination of magnetic structures, John O. Dimmock—1337
X-ray and magnetization studies of Cr-modified Mn_2Sb, F. J. Darnell, W. H. Cloud, and H. S. Jarrett—647
Magnetic Resonance (see also **Nuclear Moments and Spin**)
Approach to equilibrium in quantal systems. II. Time-dependent temperatures and magnetic resonance, A. Sher and H. Primakoff—1267
Chemical shift and relaxation of Xe^{129} in Xe gas, H. C. Torrey—2306
Color centers in alkaline earth fluorides, J. R. O'Connor and J. H. Chen—1790
Covalency and paramagnetic resonance of Mn^{++} in CdSe, Reuben S. Title—17
Covalency effects in $KNiF_3$. I. Nuclear magnetic resonance studies, R. G. Shulman and S. Sugano—506; III. Theoretical studies, S. Sugano and R. G. Shulman—517
Cu^{2+} ion in corundum, W. E. Blumberg, J. Eisinger, and S. Geschwind—900
Discussion of electron optics limit of optically pumped alkali vapor, R. R. Lewis—666
Divalent rare earth spectra selection rules and spectroscopy of $SrCl_2$:Sm^{++}, J. D. Axe and P. P. Sorokin—945
Electrically induced nuclear resonance in Al_2O_3 (ruby), Toshimoto Kushida and A. H. Silver—1692
Electron spin-lattice relaxation at defect sites; *E'* centers in synthetic quartz at 3 kilo-oersteds, J. G. Castle, Jr., D. W. Feldman, P. G. Klemens, and R. A. Weeks—577
Electron spin resonance studies of donors and acceptors in ZnO, Paul H. Kasai—989
Ferromagnetic relaxation. III. Theory of instabilities, R. M. White and M. Sparks—632
Ferromagnetic resonance of holmium nitride, Noboru Tsuya and Yoshio Ebina—960
High-field antiferromagnetic resonance in Cr_2O_3, Simon Foner—183
High-frequency resonance of weak ferromagnet: $MnCo_3$, H. J. Fink and D. Shaltiel—627
Infrared cyclotron resonance in *n*-type InAs, E. D. Palik and James R. Stevenson—1344

Magnetic Resonance (Continued)
Long-wavelength collective excitations in ferromagnetic insulators. I. Strong coupling of acoustic modes to spin wave modes, R. C. LeCraw and T. Kasuya—50
Many-body aspects of dipolar interaction in crystal lattices, R. Bersohn and T. P. Das—98
Millimeter-wave amplification by resonance saturation, Benjamin Senitzky, Gordon Gould, and Sylven Cutler—1460
Nuclear magnetic resonance of Xe^{129} in natural Xe, E. R. Hunt and H. Y. Carr—2302
Paramagnetic resonance of Cr in $MgTiO_3$, Erhard J. Schimitschek—2199
Paramagnetic resonance of divalent Ho in CaF_2, H. R. Lewis and E. S. Sabisky—1370
Paramagnetic resonance of tripositive Cm ion in ethylsulfate and trichloride crystals, Marvin Abraham, B. R. Judd, and H. H. Wickman—611
Paramagnetic resonance spectrum of Gd in $LaAlO_3$, W. Low and A. Zusman—144
Paramagnetic spectra of E_2' centers in crystalline quartz, R. A. Weeks—570
Properties of divalent Co and Ni as impurities in AgCl single crystals, T. R. Sliker—1749
Pure nuclear electric quadrupole resonance in impure Cu, Alfred G. Redfield—589
Quantum statistics of masers and attenuators, J. P. Gordon, L. R. Walker, and W. H. Louisell—806
Radio-frequency susceptibilities of weak ferromagnets: $MnCo_3$ and NiF_2, H. J. Fink—177
Raman spin-lattice relaxation of shallow donors in Si, Theodore G. Castner, Jr.—58
Relaxation time measurements in ruby by dc magnetization technique, Shih-yu Feng and N. Bloembergen—531
Rotational magnetic moments of Li hydride and deuteride, T. R. Lawrence, C. H. Anderson, and N. F. Ramsey—1865
Temperature dependence of spin-lattice relaxation in alkali halides, Marvin J. Weber—1
Theory of cavity masers, D. E. McCumber—675
Magnetohydrodynamics (see **Fluid Dynamics**)
Magneto-Optical Effects (see **Optical Properties**)
Magnetoresistance (see **Electrical Conductivity and Resistance; Semiconductors**)
Magnetostriction (see **Magnetic Properties**)
Masers (see **Magnetic Resonance**)
Mass Defects (see **Atomic Mass and Abundance**)
Mass Spectroscopy (see **Atomic Mass and Abundance; Methods and Instruments**)

Meson Field Theory (see **Field Theory**)
Mesons and Hyperons (see also **Cosmic Radiation; Elementary Particle Interactions; Nuclear Reactions Induced by Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Consequences of weak vector boson for decay $K \to \mu+\nu+\gamma$, Edward S. Ginsberg and R. H. Pratt—2105
Determination of π-meson masses by neutron time of flight, John B. Czirr—341
Experimental study of double-charged pion production in (π^-,p) collisions at 900 MeV, Derek C. Colley and Joseph T. Ratau—357
Isotopic spin in $K \to 3\pi$, G. Barton, C. Kacser, and S. P. Rosen—783
K leptonic decay and partially-conserved currents, George Zweig—2449
K^--mesonic atoms, Y. Eisenberg and D. Kessler—2351
Lifetime of Λ^0 hyperon, M. M. Block, R. Gessaroli, S. Ratti, L. Grimellini, T. Kikuchi, L. Lendinara, L. Monari, E. Harth, W. Becker, W. M. Bugg, and H. Cohn—766
Low-energy process $\gamma+p \to K^++\Sigma^0$, T. K. Kuo—1537
Low-energy Σ^--p and Σ^--d interactions and pion-hyperon coupling constants, J. J. de Swart and C. K. Iddings—319
μ-mesonic x-ray energies and nuclear radii for fourteen elements from $Z=12$ to 50, H. L. Anderson, C. S. Johnson, and E. P. Hincks—1644
New determination of K_1^0 branching ratio, John L. Brown, John A. Kadyk, George H. Trilling, Byron P. Roe, Daniel Sinclair, and John C. Vander Velde—769
Nonleptonic decays of hyperons, Suraj N. Gupta—1180
Nonleptonic hyperon decays in pole approximation and strong-coupling constants, Jogesh Chandra Pati—2097
Photoproduction of single neutral pions from H at energies 0.6 to 1.2 BeV, R. Diebold—2089
Positive pion production by polarized x rays between 227 and 373 MeV, R. C. Smith and R. F. Mozley—2429
Radiative ρ-meson decay, Paul Singer—2441
Remarks on present status of problem of x-ray deficiency in μ-mesonic atoms, Y. Eisenberg and D. Kessler—2349
Search for $\mu \to e+e+e$, S. Frankel, W. Frati, J. Halpern, L. Holloway, W. Wales, F. W. Betz, and O. Chamberlain—351
Strange-particle production by 4.65-BeV/c π^- mesons, L. Bertanza, B. B. Culwick, K. W. Lai, I. S. Mittra, N. P. Samios, A. M. Thorndike, S. S. Yamamoto, and R. M. Lea—786
Test of charge symmetry of K^+ and K^0 mesons in associated production process, Janice B. Shafer, Frank S. Crawford, Richard Hubbard, M. Lynn Stevenson, Martin Block, Arnold Engler, Rosanna Gessaroli, Arthur Kovacs, Carl Meltzer, Richard Kraemer, Mirko Nussbaum, Aihud Pevsner, Peter Schlein, and David Onley—2077
3π-decay modes of $K^\pm$ and η, Claude Kacser—355
Upper limit for nonleptonic $\Delta S=2$ decay mode of Ξ^-, Massimiliano Ferro-Luzzi, Margaret H. Alston, Arthur H. Rosenfeld, and Stanley G. Wojcicki—1568
Use of radiative π decay to limit neutrino mass, Alfred S. Goldhaber—760
Metals (see **Crystalline State**)
Metastable Atoms (see **Atomic Structure and Spectra**)
Metastable Molecules (see **Molecular Structure and Spectra**)
Meteorology (see **Geophysics**)
Methods and Instruments
Microwaves (see also **Atomic Structure and Spectra; Magnetic Resonance; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Anisotropic electron distribution and dc and microwave avalanche breakdown in H_2, G. A. Baraff and S. J. Buchsbaum—1007
Electron ionization frequency in H_2, William B. Cottingham and S. J. Buchsbaum—1002

Microwave breakdown in air, O_2, and N_2, A. D. MacDonald, D. U. Gaskell, and H. N. Gitterman—1841

Millimeter-wave amplification by resonance saturation, Benjamin Senitzky, Gordon Gould, and Sylven Cutler—1460

Radio-frequency susceptibilities of weak ferromagnets: $MnCo_3$ and NiF_2, H. J. Fink—177

Miscellaneous

Mobility of Ions and Electrons (see **Ions and Electrons, Mobility**)

Molecular Aggregates

Molecular Beams (see **Atomic and Molecular Beams**)

Molecular Structure and Spectra

Acceleration of molecular excitons by electric field, Arthur Bierman—2266

Hfs in $O^{17}H$ and OH dipole moment, Gerald Ehrenstein—669

Rotational excitation and electron relaxation in N_2, Michael H. Mentzoni and Ronald V. Row—2312

Rotational magnetic moments of Li hydride and deuteride, T. R. Lawrence, C. H. Anderson, and N. F. Ramsey—1865

Moments, Nuclear (see **Nuclear Moments and Spin**)

Moments of Molecules (see **Molecular Structure and Spectra**)

Muonium (see **Atomic Structure and Spectra; Mesons and Hyperons**)

Neutrinos and Antineutrinos (see also **Elementary Particle Interactions; Nuclear Spectra; Radioactivity**)

Use of radiative π decay to limit neutrino mass, Alfred S. Goldhaber—760

Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)

Neutrons (see **Elementary Particle Interactions**)

Noise

Nuclear Fission

Equilibrium configuration and fission barrier for liquid drop nuclei with high angular momentum, Daniel Sperber—468

Fission cross section of U^{235}, C. D. Bowman, G. F. Auchampaugh, and S. C. Fultz—1482

Fragment kinetic energy release in heavy-ion-induced fission reactions, Victor E. Viola, Jr., and Torbjørn Sikkeland—2044

Symmetry of neutron-induced U^{233} fission at individual resonances. II, G. A. Cowan, B. P. Bayhurst, and R. J. Prestwood—2380

Yields and half-lives in mass-99 fission-product chain, David E. Troutner, Robert L. Ferguson, and G. Davis O'Kelley—1466

Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)

Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)

Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)

Nuclear Moments and Spin (see also **Nuclear Spectra**)

Pseudoquadrupole coupling constants and nuclear moments of several Pm isotopes, R. W. Grant and D. A. Shirley—1100

Quadrupole antishielding factors of ions, R. M. Sternheimer—1423

Some regularities of magnetic moment distribution of odd-A nuclei, Y. F. Bow—1947

Nuclear Photoeffects

Photoproduction of single neutral pions from H at energies 0.6 to 1.2 BeV, R. Diebold—2089

Polarization of neutrons from photodisintegration of deuterium, David E. Frederick—1131

Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)

α-decay properties of some Ho isotopes near 82-neutron closed shell, Ronald D. Macfarlane and Roger D. Griffioen—1491

Electrodisintegration of H^3 and He^3, Ronald McClure Haybron—2080

Enhanced excitation of $T=0$, $S=0$ states of ground-state configuration in C^{12}-C^{13} scattering at 126 MeV, Gerald T. Garvey, Andrew M. Smith, and J. C. Hiebert—2397

Excitation functions for nuclear reactions between complex nuclei. I. Neutron emission, G. R. Choppin and T. J. Klingen—1990; II. Charged particle emission, T. J. Klingen and G. R. Choppin—1996

Excitation functions for single-nucleon transfer reactions close to barrier, K. S. Toth and E. Newman—536

Excitation functions for Tb^{149g} from reactions between complex nuclei, John M. Alexander and Gabriel N. Simonoff—2383

Fragment kinetic energy release in heavy-ion-induced fission reactions, Victor E. Viola, Jr., and Torbjørn Sikkeland—2044

γ rays from Li bombardment of B^9, B^{10}; B^{11}, and C^{13}, E. Norbeck, S. A. Coon, R. R. Carlson, and E. Berkowitz—1971

Spins and partial widths of quasi-molecular resonances in $C^{13}+C^{13}$ interactions, E. Almqvist, D. A. Bromley, J. A. Kuehner, and B. Whalen—1140

Strong $M1$ transitions in light nuclei, Dieter Kurath—1525

Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles and He^3**)

$C^{13}(He^3,n)O^{14}$ reaction at 19, 22, and 25 MeV, J. H. Manley—1475

Collective excitations in $Ni^{58,60,62}$ and $Zn^{64,66,68}$, H. W. Broek—1914

Comparison of $C^{13}(d,\alpha)B^{11}$ and $B^{11}(He^3,p)C^{13}$ reactions, B. B. Marsh and O. M. Bilaniuk—2373

Excitation functions of reactions of 7- to 24-MeV He^3 ions with Cu^{63} and Cu^{65}, E. A. Bryant, D. R. F. Cochran, and J. D. Knight—1512

New isomers of At^{213}, W. Barclay Jones—2042

Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons and Tritons**)

$B^{11}(d,n)C^{12*}_{4.43}(\gamma,n)$ angular correlations at 0.94 and 0.62 MeV, W. F. Huang and R. C. Ritter—2366

Calculation of deuteron stripping amplitudes using S-matrix reduction techniques, Alvin M. Saperstein—2054

Comparison of $C^{13}(d,\alpha)B^{11}$ and $B^{11}(He^3,p)C^{13}$ reactions, B. B. Marsh and O. M. Bilaniuk—2373

Neutrons from deuteron breakup on D, T, and He^4, H. W. Lefevre, R. R. Borchers, and C. H. Poppe—2599(E)

New limit for isotropic spin conservation in strong interactions from experimental limit on $\sigma(d+d\rightarrow He^4+\pi^0)$, John A. Poirier and Morris Pripstein—1171

Nuclear excitation functions and thick-target yields: $Zn+d$ and $Ar^{40}(d,\alpha)$, David C. Williams and John W. Irvine, Jr.—265

Nuclear excitation functions: Ar^{40}, $Zn^{68}(d,He^3)$, David C. Williams and John W. Irvine, Jr.—259

Polarization of protons from $He^3(d,p)He^4$ reaction, R. I. Brown and W. Haeberli—1163

Studies of low-lying levels of Er and W isotopes with (d,p) reactions, Akira Isoya—234

Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)

Branching ratios of reactions of mesons stopped in H and D, James W. Ryan—1554

Nuclear Reactions Induced by Mesons and Hyperons (Continued)
Emission of Li^8, Be, and B fragments from nuclei in photographic emulsion, F. O. Breivik, T. Jacobsen, and S. O. Sørensen—1119
Pion capture in complex nuclei, Zeev Fraenkel—2407
Σ^- capture in deuterium, Donald E. Neville—327
Nuclear Reactions Induced by Neutrons and Antineutrons (see also **Elementary Particle Interactions; Scattering of Neutrons and Antineutrons**)
$C^{12}(n,\alpha)Be^9$ reaction induced by 14-MeV neutrons, R. A. Al-Kital and R. A. Peck, Jr.—1500
$(n,2n)$ reaction cross sections from 12 to 19.6 MeV, L. A. Rayburn—731
$Ni^{58}(n,p)Co^{58m,g}$ cross section and isomer ratio from 1.04 to 2.67 MeV, J. W. Meadows and J. F. Whalen—2022
Nonelastic neutron cross-section measurements on Li^6, Li^7, U^{235}, and Pu^{239} at 8.1, 11.9, and 14.1 MeV, M. H. MacGregor, R. Booth, and W. P. Ball—1471
Properties of F^{20}, S. S. Glickstein and R. G. Winter—2599(E)
Reaction $Zr^{90}(n,n')Zr^{90m}$, Robert T. Wagner, E. R. Shunk, and R. B. Day—1926
Spin dependence of thermal neutron cross section of Co^{59}, R. I. Schermer—1907
Symmetry of neutron-induced U^{235} fission at individual resonances. II, G. A. Cowan, B. P. Bayhurst, and R. J. Prestwood—2380
Nuclear Reactions Induced by Protons and Antiprotons (see also **Elementary Particle Interactions; Scattering of Protons and Antiprotons**)
Level structure of Ni^{64} and Zn^{64}, J. Benveniste, A. C. Mitchell, and C. B. Fulmer—309
Monte Carlo calculation of resonance yield curves and resonance energy determination, D. W. Palmer, J. G. Skofronick, D. G. Costello, A. L. Morsell, W. E. Kane, and R. G. Herb—1153
Nuclear structure effects in high-energy (p,pn) reactions, Norbert T. Porile and Shigeo Tanaka—1541
(p,d), (p,t), and (p,α) reactions to same final states in Fe^{56} and in Zr^{90}, J. B. Ball, C. B. Fulmer, and C. D. Goodman—2342
(p,γ) resonance-curve shapes and measurements of resonance energies with H_1^+ beams, R. O. Bondelid and J. W. Butler—1078
(p,n) cross sections at 6.75 MeV, R. M. Humes, G. F. Dell, Jr., W. D. Ploughe, and H. J. Hausman—1522
Recoil properties of $Bi^{209}(p,pxn)$ spallation products, William R. Pierson and Nathan Sugarman—2417
Study of (p,pn) reactions in medium weight nuclei at 370 MeV, L. P. Remsberg and J. M. Miller—2069
Nuclear Scattering (see **Scattering**)
Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
α-decay properties of some Ho isotopes near 82-neutron closed shell, Ronald D. Macfarlane and Roger D. Griffioen—1491
α decay to vibrational states, S. Bjørnholm, M. Lederer, F. Asaro, and I. Perlman—2000
α-particle emission in decays of B^{13} and N^{12}, D. H. Wilkinson, D. E. Alburger, A. Gallmann, and P. F. Donovan—1952
Angular correlations of cascade γ rays in decay of Lu^{172}, Margaret M. Stautberg, E. Brooks Shera, and Karl J. Casper—1901
Calculations of energy spectra of nuclei in 2*s*, 1*d* shell, M. K. Banerjee, C. A. Levinson, and S. Meshkov—1064
Circular-polarization measurements in β decay of V^{48}, Co^{56}, Fe^{59}, and Cs^{134}, Lloyd G. Mann, Stewart D. Bloom, and R. J. Nagle—2598(E)
Collective excitations in $Ni^{58,60,62}$ and $Zn^{64,66,68}$, H. W. Broek—1914
Decay energy of Tb^{161}, P. F. M. Koehler, L. Slack, and N. B. Gove—1503
Decay of Ni^{56}, D. O. Wells, S. L. Blatt, and W. E. Meyerhof—1961
Direct comparison of B^{12} and N^{12} β spectra, Neel W. Glass and Robert W. Peterson—299
Electron shake-off following β decay of Ne^{23}, Thomas A. Carlson—2361
γ rays from Li bombardment of B^9, B^{10}; B^{11}, and C^{13}, E. Norbeck, S. A. Coon, R. R. Carlson, and E. Berkowitz—1971
Half-lives of first excited states in Sn^{117}, Te^{121}, Te^{123}, and Sb^{123}, M. Schmorak, A. C. Li, and A. Schwarzschild—727
Half-lives of N^{13} and B^{13}, Thornton R. Fisher—2388
Internal conversion coefficients in decay of Au^{199}, R. L. Hahn and W. S. Lyon—306
Isospin conservation and β-γ circular-polarization correlation in mixed transition, Stewart D. Bloom, Lloyd G. Mann, and John A. Miskel—2598(E)
Level structure of Ni^{64} and Zn^{64}, J. Benveniste, A. C. Mitchell, and C. B. Fulmer—309
Lifetimes of excited states using delayed-reaction γ rays, R. W. Bauer, J. D. Anderson, and L. J. Christensen—312
Lifetimes of first excited states of Mg^{25} and Al^{25}, C. L. McClelland and J. Lowe—1127
Monoenergetic positron line and three new γ transitions in Bi^{206}, R. Wiener, C. Chasman, P. Harihar, and C. S. Wu—1069
New isomers of At^{212}, W. Barclay Jones—2042
Properties of F^{20}, S. S. Glickstein and R. G. Winter—2599(E)
Pseudoquadrupole coupling constants and nuclear moments of several Pm isotopes, R. W. Grant and D. A. Shirley—1100
Search for delayed-neutron emission in Br^{86} decay, Ellis P. Steinberg and Larry L. Schwartz—1472
Sign of mixing ratio δ, L. Simons and I. Forsblom—1499
Some N^{12} and B^{12} measurements, R. W. Peterson and N. W. Glass—292
Studies of low-lying levels of Er and W isotopes with (d,p) reactions, Akira Isoya—234
Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)
Calculation of binding energy of nuclear matter by method of reference spectrum, M. Razavy—1091
Calculation of elastic and inelastic proton scattering with generalized optical model, B. Buck—712
Calculations of energy spectra of nuclei in 2*s*, 1*d* shell, M. K. Banerjee, C. A. Levinson, and S. Meshkov—1064
Effect of nonlocal potential on barrier penetrability in α decay, Manujendra Lal Chaudhury—2339
Equilibrium configurations and fission barrier for liquid drop nuclei with high angular momentum, Daniel Sperber—468
N^{14} and shell model, William W. True—1530
New methods in nuclear structure calculations, M. K. Banerjee and C. A. Levinson—1036
Nuclear properties of $_{28}Mn^{55}$ (semiatomic model), Y. F. Bow—1931
Observations on energies of single-particle neutron states, Bernard L. Cohen—227
Some regularities of magnetic moment distribution of odd-*A* nuclei, Y. F. Bow—1947
Strong *M*1 transitions in light nuclei, Dieter Kurath—1525
Surface properties of ground-state nuclear matter, John C. Reynolds—1891
Volume properties of ground-state nuclear matter, John C. Reynolds and Robert D. Puff—1877

Optical Instruments (see **Methods and Instruments**)
Optical Properties (see also **Luminescence**)
Color centers in alkaline earth fluorides, J. R. O'Connor and J. H. Chen—1790
Color centers in mixed crystals of alkali halides, A. Smakula, N. C. Maynard, and A. Repucci—113
Covalency effects in $KNiF_3$. II. Optical studies, K. Knox, R. G. Shulman, and S. Sugano—512
Divalent rare earth spectra selection rules and spectroscopy of $SrCl_2:Sm^{+2}$, J. D. Axe and P. P. Sorokin—945
Effect of defect fields on optical absorption edge, David Redfield—916
Electrical and optical properties of vitreous Se, H. P. D. Lanyon—134
Far uv absorption spectrum of Mn, H. Kroger and D. H. Tomboulian—152
Infrared absorption at longitudinal optic frequency in cubic crystal films, D. W. Berreman—2193
Infrared cyclotron resonance in *n*-type InAs, E. D. Palik and James R. Stevenson—1344
Infrared reflectivities of Mg_2Si, Mg_2Ge, and Mg_2Sn, D. McWilliams and D. W. Lynch—2248
Lattice vibration spectra of Ge-Si alloys, R. Braunstein—879
Lifetime of excited *F* center, Robert K. Swank and Frederick C. Brown—34
Low-temperature coloration in KCl and KBr near fundamental edge, Clifford C. Klick and David A. Patterson—2169
Luminescent decay of localized optical excitations in KCl, Herbert Mahr—2257
Magneto-optical oscillations in free carrier and interband absorption of semiconductors, E. D. Palik and R. F. Wallis—41
Nonlinear optical properties of solids: energy considerations, P. S. Pershan—919
Optical absorption in electric field, Joseph Callaway—549
Optical absorption in ionic crystals involving small polarons, D. M. Eagles—1381
Optical absorption in presence of uniform field, K. Tharmalingam—2204
Optical spectrum of divalent V in octahedral coordination, M. D. Sturge—639
Properties of divalent Co and Ni as impurities in AgCl single crystals, T. R. Sliker—1749
Quantum theory of optical coherence, Roy J. Glauber—2529
Scattering, absorption, and emission of light by thin metal wires, B. Agdur, G. Böling, F. Sellberg, and Y. Öhman—996
Theory of quadratic response functions, P. J. Price—1792
Theory of stimulated Raman scattering, R. W. Hellwarth—1850
Valence band structure of Ge-Si alloys, R. Braunstein—869

Gravitational field energy and g_{∞}, Charles W. Misner—1590
Quantized gravitational field, Julian Schwinger—1253
Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss**)
Analysis of partial-wave dispersion relations, Graham Frye and Robert Lee Warnock—478
Backscatter from inhomogeneous media, P. J. Lynch—1235
Charge exchange and dissociation of H^+, H_2^+, and H_3^+ ions incident on H_2 gas, G. W. McClure—1852
Collision lifetimes in many-body processes, Felix T. Smith—394
Construction of invariant scattering amplitudes for arbitrary spins and analytic continuation in total angular momentum, Asim O. Barut, Ivan Muzinich, and David N. Williams—442
Crossing symmetry in S-matrix theory, A. O. Barut—436
Dispersion relation for Regge parameters, Hung Cheng—1283
Elastic nucleon-deuteron scattering, K. L. Kowalski and D. Feldman—276
Enhanced excitation of $T=0$, $S=0$ states of ground-state configuration in C^{12}-C^{13} scattering at 126 MeV, Gerald T. Garvey, Andrew M. Smith, and J. C. Hiebert—2397
Evaluation of Van Hove correlation functions for certain physical systems, Roger B. De Bar—827
Extension of the Regge representation, N. N. Khuri—429
Extrapolation methods and nucleon-deuteron breakup reaction, I. J. R. Aitchison—2484
High-energy nucleon-nucleon scattering, Ivan J. Muzinich—1571
Improved minimum principle for single-channel scattering, Yukap Hahn, Thomas F. O'Malley, and Larry Spruch—381
Interaction potentials from velocity dependence of total atom-atom scattering cross sections, Erhard W. Rothe, P. K. Rol, and Richard B. Bernstein—2333
Isotopic spin of exchange systems, Leslie L. Foldy and Ronald F. Peierls—1585
N/D method for complex partial waves, K. Bardakci—369
Perturbation theory of scattering amplitudes at high energies, James D. Bjorken and Tai Tsun Wu—2566
Phase representation of analytic functions, Masao Sugawara and Arnold Tubis—2127
Radiative corrections to high-energy scattering processes, N. Meister and D. R. Yennie—1210
Regge poles in relativistic wave equations. G. S. Guralnik and C. R. Hagen—1259
Regge trajectories and elementary poles, Reinhard Oehme—424
Separable potentials in complex l plane, A. N. Mitra and J. D. Anand—2117
Singularities in unphysical sheets and isobar model, Rudolph C. Hwa—2580
Singularity of Regge amplitude, J. N. Islam, P. V. Landshoff, and J. C. Taylor—2560
Theory of low-energy nucleon-nucleon scattering. IV. Numerical results for high partial waves ($l \geq 2$), D. Amati, E. Leader, and B. Vitale—750
Threshold motion of Regge poles, Bipin R. Desai and Roger G. Newton—2109
Scattering of α Particles and He^3 (see also **Nuclear Reactions Induced by α Particles and He^3**)
Collective excitations in $Ni^{58,60,62}$ and $Zn^{64,66,68}$, H. W. Broek—1914
Scattering of He^3 from He^3, T. A. Tombrello and A. D. Bacher—1108
Scattering of He^3 from He^4, T. A. Tombrello and P. D. Parker—1112
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Angular distributions from elastic scattering of 15-MeV deuterons, R. K. Jolly, E. K. Lin, and B. L. Cohen—2391
Proton-triton elastic scattering below 1 MeV, Nelson Jarmie, M. G. Silbert, D. B. Smith, and J. S. Loos—1987
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Born cross sections for inelastic scattering of electrons by H atoms. IV. Approximate values for allowed transitions up to $n=10$, Gerard C. McCoyd and S. N. Milford—206
Discussion of electron optics limit of optically pumped alkali vapor, R. R. Lewis—666
Displacement cross sections for fast electrons incident on Au, G. S. Khandelwal and E. Merzbacher—1822
Electrodisintegration of H^3 and He^3, Ronald McClure Haybron—2080
Electron-proton scattering at high momentum transfer, K. Berkelman, M. Feldman, R. M. Littauer, G. Rouse, and R. R. Wilson—2061
Energy dependence of proton electromagnetic form factors, S. H. Patil—2448
Extrapolation of electron-rare gas atom cross sections to zero energy, Thomas F. O'Malley—1020
Final-state interactions in electrodisintegration of D, J. Nuttall and M. L. Whippman—2495
High-energy behavior of scattering amplitude in quantum electrodynamics, Maurice Lévy—791
Inelastic electron scattering studies: Cu^{63}, In^{115}, Ta^{181}, Pb^{208}, Bi^{209}, H. W. Kendall and Jan Oeser—245
Low-energy spectrum of electrons scattered on bound electrons, T. A. Weber, R. T. Deck, and C. J. Mullin—660
Model for scattering of slow electrons by Cs atoms, W. R. Garrett and R. A. Mann—658
Precision measurement of g factor of free electron, D. T. Wilkinson and H. R. Crane—852
Rotational excitation and electron relaxation in N_2, Michael H. Mentzoni and Ronald V. Row—2312
Statistical analysis of electron-proton scattering, M. W. Kirson and J. S. Levinger—1549
Statistics of particle diffusion in spherical geometry, B. T. McClure—1295

Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Branching ratios of reactions of mesons stopped in H and D, James W. Ryan—1554
Elastic-differential cross section of $\pi^+ + p$ at 1.5, 2.0, and 2.5 BeV/c, Victor Cook, Bruce Cork, William R. Holley, and Martin L. Perl—762
Experimental study of double-charged pion production in $(\pi^- - p)$ collisions at 900 MeV, Derek C. Colley and Joseph T. Ratau—357
Theory of $J=3/2$, $I=3/2$ πN resonance, Virendra Singh and Bhalchandra M. Udgaonkar—1177
Two vacuum poles and pion-nucleon scattering, Keiji Igi—820
Scattering of Neutrons (see also **Diffraction; Nuclear Reactions Induced by Neutrons**)
Elastic nucleon-deuteron scattering, K. L. Kowalski and D. Feldman—276
Evaluation of Van Hove correlation functions for certain physical systems, Roger B. De Bar—827
Intermediate scattering function in slow neutron scattering, A. Rahman—1334
Neutron diffraction study of short-range order in β-CuZn, C. B. Walker and D. T. Keating—1726
Neutron-proton scattering below 20 MeV, H. Pierre Noyes—2025
Polarization effects in magnetic elastic scattering of slow neutrons, M. Blume—1670
Polarization in neutron-proton scattering at 23.1 MeV, R. B. Perkins and J. E. Simmons—272
Slow-neutron scattering by hindered rotators, Sidney Yip and R. K. Osborn—1860
Spin dependence of thermal neutron cross section of Co^{59}, R. I. Schermer—1907
Scattering of Protons and Antiprotons (see also **Nuclear Reactions Induced by Protons and Antiprotons**)
Balmer emissions induced by proton impact on molecular H_2, R. H. Hughes, Sabrina Lin, and L. L. Hatfield—2318
Bremsstrahlung from proton bombardment of nuclei, David Cohen, Burton J. Moyer, Harlan C. Shaw, and Charles N. Waddell—1505
Calculation of elastic and inelastic proton scattering with generalized optical model, B. Buck—712
Elastic nucleon-deuteron scattering, K. L. Kowalski and D. Feldman—276
Elastic scattering of protons from Li^6 nuclei, J. A. McCray—2034
Electron capture by protons passing through hydrogen, T. Pradhan and D. N. Tripathy—2317
Electron capture from atomic N and O by protons. I, Robert A. Mapleton—1829
Electron capture from He($1s^2$) by protons. II, Robert A. Mapleton—1839
Energy and angular dependence of differential cross section for production of electrons by 50–100 keV protons in H_2 gas, C. E. Kuyatt and T. Jorgensen, Jr.—1444
Level structure of Ni^{64} and Zn^{64}, J. Benveniste, A. C. Mitchell, and C. B. Fulmer—309
p-p higher partial waves and 3-meson model, William Ramsay—1552
Polarization of 9.4-MeV protons elastically scattered from Cu, A. B. Robbins, K. A. Grotowski, and G. W. Greenlees—707
Proton-triton elastic scattering below 1 MeV, Nelson Jarmie, M. G. Silbert, D. B. Smith, and J. S. Loos—1987
Scattering of 19.2 GeV/c protons on free protons in nuclear emulsion, V. A. Bull and D. A. Garbutt—1182
Scattering of Radiation (see **Gamma Rays; Radiation; X Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors

Spectroscopy Technique (see **Methods and Instruments**)
Spinor Fields (see **Field Theory**)
Standards (see **Constants, Standards, Units**)
Stark Effect (see **Atomic Structure and Spectra**)
Statistical Mechanics and Thermodynamics
Approach to equilibrium in quantal systems. II. Time-dependent temperatures and magnetic resonance, A. Sher and H. Primakoff—1267
Boltzmann equation for polarons, Leo P. Kadanoff—1364

Statistical Mechanics and Thermodynamics (Continued)
Cluster expansion for Heisenberg ferromagnet, Bertram Strieb, Herbert B. Callen, and Gerald Horwitz—1798
Collision lifetimes in many-body processes, Felix T. Smith—394
Dielectric formulation for many-particle systems with general interactions, Pedro Pascual and L. M. Falicov—1310
Evaluation of Van Hove correlation functions for certain physical systems, Roger B. De Bar—827
Exact analysis of interacting Bose gas. I. General solution and ground state, Elliott H. Lieb and Werner Liniger—1605; II. Excitation spectrum, Elliott Lieb—1616
Generalized self-consistent field theory and dielectric formulation of many-body problem, Morrel H. Cohen—1301
Green function theory of ferromagnetism, Herbert B. Callen—890
Ground state of interacting spins, Daniel Mattis—76
Higher random phase approximations and theory of electron gas, Giu Do Dang and Abraham Klein—2572
Ising model with long-range interaction in presence of residual short-range interactions, George A. Baker, Jr.—1406
Kinetic equations for fully ionized, inhomogeneous plasmas, Richard K. Osborn—2142
Quantum mechanical calculation of third virial coefficient of He^4, Sigurd Yves Larsen—1426
Quantum statistics of masers and attenuators, J. P. Gordon, L. R. Walker, and W. H. Louisell—806
Reformulation of theory of pairing correlations, Michel Baranger—1244
Simplified approach to ground-state energy of imperfect Bose gas, Elliott H. Lieb—2518
Statistical mechanical theory of condensation, M. Cooper-smith and R. Brout—2539
Theory of quadratic response functions, P. J. Price—1792
Thermal fluctuations of single-domain particle, William Fuller Brown, Jr.—1677
Thermodynamic behavior of Heisenberg ferromagnet, R. B. Stinchcombe, G. Horwitz, F. Englert, and R. Brout—155
Use of Green functions in theory of ferromagnetism. III. *s-d* interactions, R. A. Tahir-Kheli, and D. ter Haar—108
Weak-coupling rate equations and initial conditions, Robert L. Peterson—612
Zero-temperature properties of many-fermion system, G. Horwitz, R. Brout, and F. Englert—409
Statistical Methods (see **Mathematical Methods**)
Strange Particles (see **Elementary Particle Interactions; Mesons and Hyperons**)
Superconductivity
Comments on existing theories of magnetic effects on superconducting films, B. Y. Tong—1322
Critical fields of thin superconducting films. II. Mean free path effects in InSn alloy films, A. M. Toxen and M. J. Burns—1808
Hall coefficient of superconducting and normal Nb-25% Zr, A. I. Schindler and D. J. Gillespie—953
Limiting critical field in thin superconductors, N. Kusnezov—2253
Rate of capture of electrons injected into superconducting Pb, Allen Rothwarf and Michael Cohen—1401
Size factor and superconducting properties of some transition metal solutions, Warren DeSorbo—2177
Superconductivity in Hg-In alloy system, M. F. Merriam, M. A. Jensen, and B. R. Coles—1719
Supersonics (see **Fluid Dynamics**)
Surface Physics
Two-photon photoelectric effect, Richard L. Smith—2599(E)
Thermal Conductivity (see **Thermal Properties**)
Thermal Diffusion (see **Diffusion**)
Thermal Expansion (see **Thermal Properties**)
Thermal Properties
Calculated vibrational spectra and specific heats of Li and V, John B. Hendricks, Henry N. Riser, and Clifton Bob Clark—1377
Conductivity of polycrystals, Z. Hashin and S. Shtrikman—129
Experiments on Kapitza resistance, R. C. Johnson and W. A. Little—596
Heat capacity of α-CuZn alloys below 4.2°K, B. W. Veal and J. A. Rayne—2156
Low-temperature specific heats of Ti, Zr, and Hf, G. D. Kneip, Jr., J. O. Betterton, Jr., and J. O. Scarbrough—1687
Melting and polymorphic transitions for some group II-VI compounds at high pressures, A. Jayaraman, W. Klement, Jr., and G. C. Kennedy—2277
Melting and polymorphism at high pressures in some group IV elements and III-V compounds with diamond/zinc-blende structure, A. Jayaraman, W. Klement, Jr., and G. C. Kennedy—540
Second neighbor exchange integral in EuS, Joseph Callaway and D. C. McCollum—1741
Semiempirical approach to theory of thermal diffusion in crystals, L. A. Girifalco—2599(E)
Specific heat of various graphites between 0.4 and 2.0°K, B. J. C. van der Hoeven, Jr., and P. H. Keesom—1318
Thermal conductivity of dilute Cu alloys, M. Garber, B. W. Scott, and F. J. Blatt—2188
Thermal conductivity of Si from 300 to 1400°K, H. R. Shanks, P. D. Maycock, P. H. Sidles, and G. C. Danielson—1743
Thermal Radiation (see **Radiation**)
Thermionic Emission (see **Electrical Properties**)
Thermodynamics (see **Statistical Mechanics and Thermodynamics**)
Thermoelectric Effect (see **Electrical Properties; Semiconductors**)
Thermoluminescence (see **Luminescence**)
Thermomagnetic Effect (see **Magnetic Properties**)
Total Cross Sections (see **Electrons and Positrons; Nuclear Reactions**)

Units (see **Constants, Standards, Units**)

Van der Waals Forces (see **Molecular Structure and Spectra**)
Viscosity (see **Liquids**)

Wave Mechanics (see **Quantum Mechanics**)
Work Function (see **Electrical Properties**)

X Rays
Electron number of N atom in Mn_4N, Masao Kuriyama, Sukeaki Hosoya, and Tadasu Suzuki—898
K^--mesonic atoms, Y. Eisenberg and D. Kessler—2351
Measurement of Pb *M* photon intensity in Po^{210} decay—further gross inadequacy of theory, William Rubinson—2011
μ-mesonic x-ray energies and nuclear radii for fourteen elements from $Z=12$ to 50, H. L. Anderson, C. S. Johnson, and E. P. Hincks—2468
Remarks on present status of problem of x-ray deficiency in μ-mesonic atoms, Y. Eisenberg and D. Kessler—2349
